
Business Problem

Analyze overall sales performance, category-wise revenue, discount strategy, and inventory status to identify growth opportunities.

Key Metrics Insight

Insight

- **Total Revenue:** ₹2.24M → Strong overall business performance
- **Total Products:** 4K → Large product variety
- **Average Discount:** ~7.62% → Moderate discount strategy
- **Out of Stock:** 453 products → Significant inventory gap

Business Impact

- High product variety increases **customer choice**
- Moderate discount suggests **profit-focused pricing**
- High out-of-stock count may lead to:
    - Lost sales
    - Poor customer experience

Recommendation

- Reduce stockouts using **inventory forecasting**
- Increase discounts slightly in competitive categories
- Focus on availability of **high-demand products**

Revenue by Category

Insight

- **Top Revenue Categories:**
  - Cooking Essentials
  - Munchies
  - Paan Corner
  - Personal Care
- **Low Revenue Categories:**
  - Fruits & Vegetables
  - Meats, Biscuits

Business Impact

- Business is heavily dependent on:
  - **Packaged & essential goods**
- Fresh categories are underperforming → possible:
  - Supply chain issues
  - Low demand

Recommendation

- Invest more in **top-performing categories**
- Improve logistics for **fresh items**
- Run targeted promotions for low-performing categories

Average Discount by Category

Insight

- **Highest Discounts:**
  - Fruits & Vegetables (~15%)
  - Meats (~11%)
- **Lowest Discounts:**
  - Home & Cleaning
  - Personal Care

Business Impact

- High discounts in fresh items indicate:
    - **Perishable nature (need quick sales)**
- Low discounts in other categories suggest:
    - Stable demand
    - Strong brand dependency

Recommendation

- Use **dynamic pricing** for perishable goods
- Increase discounts slightly in low-discount categories
- Optimize discount strategy across categories
